Introduction to Team Building

During your visit at Bolsa Chica, you will learn about how plants and animals rely on each other for survival and how habitat restoration and conservation strengthens the overall success of the ecosystem. Your team will learn about the concepts of ecology and conservation and be able to apply them to the work that you do to achieve greater success in your own professional ecosystem.

Importance

- ✓ Team Engagement
- ✓ Morale
- ✓ Creative Problem Solving

Benefits of Team Building with Bolsa Chica

Bringing your team to Bolsa Chica for a team building activity helps with engagement by boosting moral and connection. While immersed in a beautiful and natural environment and learning about the adaptations that wildlife use to stay resilient, your team will fight burnout and workplace fatigue.

Your team deserves a unique experience full of fun, adventure, and purpose.

**Better
Communication**

**Stress release
and improved
morale**

**New
perspectives for
problem solving**

Types of Team Building Activities

Regardless of if you have a small team or a large group, we can help find a way to engage everyone with a memorable experience. Are you looking for adventure with a sense of service and purpose? A more introspective learning opportunity to boost creativity? Or possibly a social retreat to build shared memories and build relationships? The Bolsa Chica Conservancy is happy to craft the perfect experience that your group will talk about all year!

Physical

Work on teamwork and trust while cleaning up trash in a kayak relay!

Work to remove weeds from sensitive habitats and challenge your group with a project and some exploration.

Intellectual

Let us share some of the inspirational ways that wildlife survive here in the wetlands. We will then challenge your creativity with hands-on activities that solve problems and support education.

Social

Does your team need to bond but happy hours and mixers aren't the right fit? Let us fill in the fun with some beautiful scenery, games, and some good times that your team share and remember!

Physical Activities

There is always work to be done at Bolsa Chica, however this experience goes beyond the standard community service project. Removing trash and non-native vegetation is key in keeping our ecosystem clean and healthy but we can use these projects to keep your team healthy too! Challenges focus on teamwork, healthy competition, adventure/exploration, and the gratification of helping the environment.

A group of people, mostly wearing yellow shirts, are working in a field of low-lying vegetation. Some are bending over, possibly pulling weeds or planting. In the background, there are palm trees and a clear sky. The foreground shows a close-up of the ground with some green and brown plants.

➤ **Our team is First-Aid/CPR certified and all work is supervised closely for safety.**

Healthy Habitats (\$70/person):

- Includes promotional garden glove gift
- Lunch and refreshments
- Service project and guided team challenges

Kayak Clean-Up (\$100/person):

- Limit 20 at a time, rotating activities available.
- All materials and intro to kayaking provided
- Lunch and refreshments

Intellectual Activities

Presentations (\$25/hour):

Do you have a conference or meeting that you would like us to present at? We are happy to provide a guided lesson to help your team learn about the wonders of our wildlife and apply ecological concepts to your professional environment. Includes printed materials for your group and promotional pen & pencil.

Activities in a Box

Help us to construct educational kits for our Wetlands on Wheels outreach program that we can take to under-resourced schools or make backpacks for homeschool groups to use in self-guided activities here at Bolsa Chica. This can be added to other activities or we can bring this activity to you! (prices vary based on quantity).

Problem Solving Activities (\$10/person)

Nature is great at finding ways to adapt to new challenges. Let us share some of the obstacles that wildlife face in the wetlands and the awe-inspiring ways they have managed to survive. Our staff will then guide your team in hands-on problem solving activities that encourage teamwork, innovation, and creativity. Add this to a presentation or physical activity.

Art and Reflection

Observation is a key skill for scientific thinking and can help your team to identify issues and develop solutions. Through guided art activities, we can help your team to expand their observational skills, attention to detail, and ability to ask questions. Includes all materials and printed workbook.

Social Activities

All teams go through phases of productivity when changes occur, and so do our ecosystems! Whether you have new team members, transitional challenges, or you just love to hang out together, we can create a memorable and fun outing for your group! Options include a guided sunset or morning walk, reception with refreshments, eco-themed team building games, and more! \$350/group (space is limited- best for groups of 20 or less).

Forming

Storming

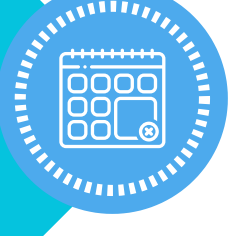

Norming

Performing

Adjourning

The Whole Enchilada

Does it all sound so good that you can't pick just one? We're happy to work with you to craft the perfect day for your team! Tell us the size of your group, the dates you are interested in, and the goals for your experience, and we will work with you to make it happen.
